Profile Summary

A dedicated **software developer** with **more than 4 years** of experience in modern software development across **local** and **international** teams, recognized for **strong time management**, **collaborative mindset**, and a **continuous drive to learn, grow and deliver**.

Skills

Domain Knowledge: ERP System, E-Commerce, Restful API & SaaS

Proficient Stacks: Python, Django, FastAPI, PostgreSQL, MySQL, Javascript, Typescript, ReactJs, NextJs, Bootstrap, Tailwind CSS, jQuery

Familiar Stacks: Docker, Linux administration, Codex AI, Cursor, AWS, Digital Ocean

Project Management Tools: JIRA, Trello, Slack, Notions

Other: Version Control Systems (Git), Unit Testing & Integration Testing

Languages: Khmer (Mother tongue), English (Advanced level), Japanese (Conversational)

Experience

Fullstack Developer, Phnom Penh, Cambodia

June 2025 – Present

Zeng 18 (Emart24)

Saambok

- **Developed** a scalable HR Management System, automating attendance and payroll workflows to reduce manual administrative work.
- **Built** a responsive web application for mobile, tablet, and desktop, delivering a consistent user experience across devices.
- **Implemented** a location-based Clock In/Out feature with distance validation to enforce on-site attendance and improve record accuracy.
- **Developed** an Attendance Reporting module and automated payroll generation, enabling efficient reporting while reducing processing time and human error.
- **Optimized** application performance, maintained production systems, resolved critical issues, and prioritized user feedback to improve stability and reliability.
- **Successfully deployed** the system to multiple organizations and provided ongoing technical support for internal teams and external clients.
- **Contributed** to the Mouy App by leveraging agentic AI to create design mock ups and interactive prototypes, and managed multilingual localization for natural, contextually accurate translations.

Frontend Web Developer, Tokyo, Japan

Aug 2024 – June 2025

Kirirom Digital

- **Developed** a Next.js application to deliver AI-generated tech news videos, enabling users to consume news through synchronized video and audio content.
- **Implemented** video preview, download, and sharing features to improve content accessibility and encourage user engagement.
- **Designed and integrated** an intuitive user interface to simplify interaction with AI-generated video content, enhancing the overall user experience.

- **Successfully deployed** the application, providing users with an accessible platform for consuming AI-driven news content.
- **Increased user engagement** by enabling seamless video sharing and content distribution, and **delivered** a responsive, user-friendly experience across the application.

Software Developer, Phnom Penh, Cambodia
Salacyber

Jan 2024 – Aug 2024

Cybersecurity Lab Test Platform

- **Built** a full-stack web application with Django to simulate a cybersecurity lab environment, providing an interactive platform for hands-on security training.
- **Designed** and **implemented** an intuitive interface for managing AWS EC2 instances and retrieving lab scenarios, simplifying lab administration.
- **Developed** server-side validation and automated scoring logic to evaluate user submissions accurately and provide instant feedback.
- **Integrated** AWS services to automate EC2 instance provisioning and management, improving scalability and operational efficiency.

Point of Sale (POS) System

- **Developed** a full-featured Django-based POS system to streamline order management, enabling sellers to efficiently create, retrieve, update, and delete orders.
- **Built** dashboards for order tracking, inventory management, and sales reporting, providing real-time business insights for informed decision-making.
- **Integrated** interactive alerts with SweetAlert to improve user feedback and enhance the overall user experience.

Software Developer, Kampong Speu, Cambodia
A2A town (Cambodia) Co., Ltd

Sep 2021 – Nov 2023

A2A Odoo Upgrade

- **Developed** and enhanced Odoo ERP modules, including Market List, Inventory, Purchase History, and multi-company functionality.
- **Collaborated** with end-users and stakeholders to gather requirements and translate business needs into scalable ERP solutions.
- **Led** the Market List development team, coordinating feature implementation and delivering system enhancements.
- **Performed** data migration, unit testing, integration testing, and system maintenance to ensure stable and reliable ERP operations.
- **Worked** closely with Sales, CRM, Inventory, Purchasing, and Hotel Management teams to integrate business workflows and improve operational efficiency.

Education

Bachelor of Engineering, Software Engineering
Kirirom Institute of Technology, Kampong Speu, Cambodia

October 2019 – November 2023

High School Diploma
Net Yang High School, Battambang, Cambodia

2016 – 2019

Personal Projects

- **Led a team, developed** and **deployed** a side-scrolling **mobile game** using **Godot Engine** for a mobile game dev bootcamp in university.
- **Developed** a **web application** using **React, Tailwind, Redux** for a web app bootcamp in university.
- **Developed** a **website** using **React, Tailwind** for showcasing AI services on the market.
- Currently **creating structured lessons** and **teaching** young high school students the **Python** programming language.
- **Building** my own **E-commerce website** using **FastAPI**.
- **Developing** a **mobile application** to manage football team and time management using **Flutter**.
